

ARGO

TOMORROW'S TECHNOLOGY ON TODAY'S ROADS

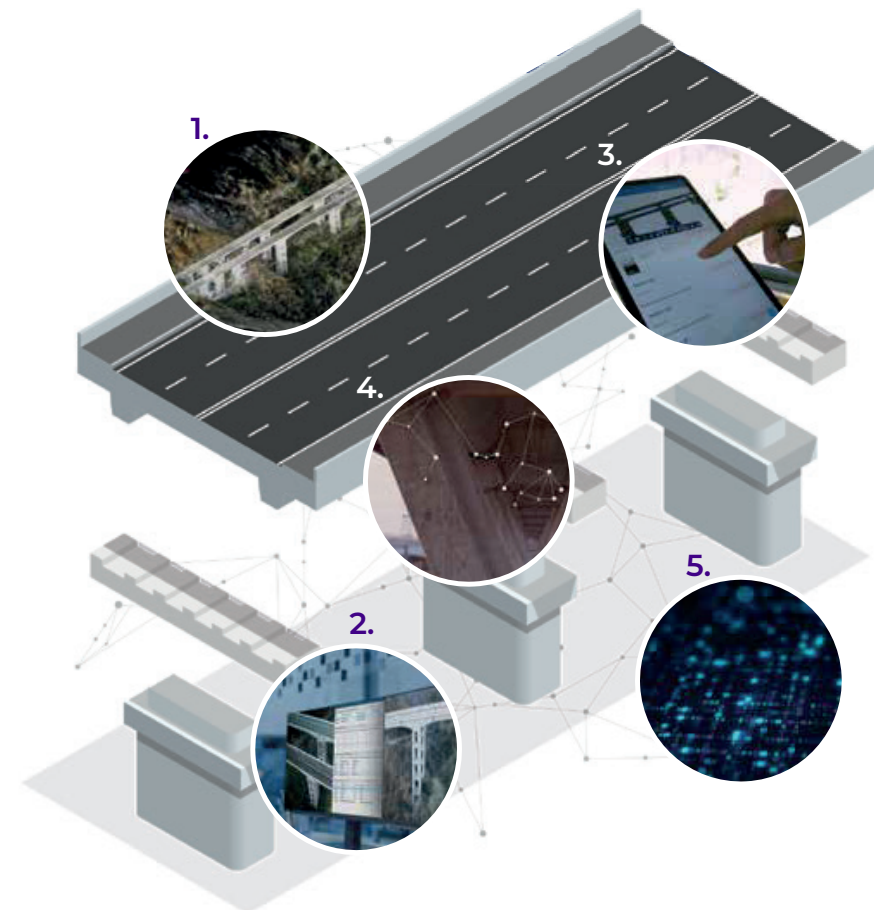

Argo is the extended **management and monitoring platform for the infrastructure life cycle**. All the potential of Digital Engineering in a single solution:

1. Complete **digitization** of infrastructure assets
2. **Asset Manager** for management, governance and control of data and processes
3. **Mobile APP** and Digital Twin to support on-site and remote inspections
4. Integration of data collected by **IoT sensors** for structural monitoring
5. **Artificial Intelligence** for image recognition and defects' analysis

ARGO'S BENEFITS

Analytics and reporting on assets and defects
Full digitization of inspection process
Transparency and data control
Modular and scalable platform
Health monitoring of infrastructures

ARGO'S FIGURES ON AUTOSTRADE PER L'ITALIA'S NETWORK

3,000 km road network

650,000+ components

4,400+ bridges, viaducts and overpasses

600+ tunnels
